

MEGA P&C Marine Coatings

The MEGA P&C marine coating product series covers various areas of vessels including decks, topsides, hulls, antifouling systems, dry cargo holds, ballast tanks, and liquid cargo tanks. Suitable for both new construction and maintenance projects, our coatings offer excellent surface tolerance, impact resistance, abrasion resistance, and anticorrosion properties. They also feature outstanding technical characteristics such as oil resistance, chemical resistance, seawater immersion resistance, fast drying, and low-temperature application capabilities, providing comprehensive protection for ships and contribute to the extension of their service life. The main products of MEGA P&C marine coatings are as follows:

Product Position	New Construction Project Products	Maintenance Project Products	Product Advantages
Deck	Pure epoxy coating	Low-surface epoxy coating	High surface tolerance, impact resistance, easy to clean, anti-slip, low-temperature application, oil resistance, chemical resistance, easy application
Freeboard	Pure epoxy coating	Low-surface epoxy coating	Wear resistance, surface tolerance, overcoating property, seawater immersion resistance, quick-drying, high film thickness build-up, low-temperature application
Hull	Pure epoxy coating	Low-surface epoxy coating	Wear resistance, surface tolerance, impact resistance, corrosion resistance in immersed areas, compatibility with antifouling paints below the waterline, smooth topcoat, quick-drying, high film thickness build-up
Antifouling Paint	Methyl acrylate silane self-polishing antifouling paint	Hydrolytic self-polishing antifouling paint	Excellent antifouling performance, preventing shellfish fouling (barnacles), preventing sludge, non-toxic self-polishing, fuel saving
Dry Cargo Hold	Modified epoxy coating	Epoxy coating	Wear resistance, surface tolerance, impact resistance, gloss, easy to clean, quick-drying, high film thickness build-up, grain certification / FDA certification, bright color
Ballast Tank	Pure epoxy coating	High-performance epoxy coating	Surface tolerance, moisture resistance, quick-drying, excellent corrosion resistance, excellent flexibility, low-temperature application, PSPC certification
